

Option 2 Clubhouse Government allow the use of indoor spaces provided rule of 6/2 households is observed, together with social distancing and the wearing of masks in all indoor areas except when eating and drinking. The sub group were in agreement that the benefit outweighed the risk and that the clubhouse will be available, with tables being set out at social distance with no more that 6 chairs to a table. These should not be re-arranged 24 hour ventilation will be provided.

Clubhouse tables/seating and general use to become available as from Wednesday 19 May 2021 with safeguards in place. Hands, Space, Face

Option 3 Changing Rooms and lockers. BE guidance states that changing rooms can be reopened but that participants should be encouraged to avoid or minimise use where possible. Given that these areas were previously designated inclement weather shelters and with the opening of the club house the sub group were of the opinion that with 24 hour ventilation, social distancing being maintained and masks being worn the benefit outweighed the risk

Changing rooms (Sherborne and Conservatory) together with and lockers to become available from Wednesday 19 May 2021 with safeguards in place

Option 4 Kitchen Government requirement = Social distancing to be maintained avoid congregation have through ventilation wherever possible use disposable condiments and individually packaged items. The sub group contemplated long and hard over provision, even discussing whether the requirement could be met under a two man controlled environment of the communal kitchen facility. On balance in addition to agreeing that the risk heavily outweighed the benefit it was evident that the government requirement could not be met and in addition no set routine could be installed to ensure all utensils and shared crockery were put to the dishwasher before restowing. Finally adequate 24 hour ventilation could not be provided without a security compromise.

Kitchen to remain closed as requirements and safeguards could not be met

Option 5 Bar The Sub Committee examined whether a one way system could be installed enroute to the bar to avoid congregation and maintain social distancing together with the possibility of offering rink side service but these were seen as both impracticable and unworkable For very similar reason as for kitchen whereby a set routine could be installed to ensure all glasses were put to the dishwasher before restowing it was agreed that the bar should not re-open. However the self service soft drink/water chiller will be re-commissioned on the honesty box principal.

Bar to remain closed soft drink chiller to be recommissioned as soon as can be restocked.

Option 6 Equipment The Sub Group agreed to review the use of scoreboards in relation to the transmission risk evident in that all 60 individual plates would need sanitising after each play and that given the high level of probability this would not always be carried out to the required level therefore the transmission risk would be assessed as very high. Therefore the general provision of scoreboards was not approved. However the sub group were keen that for matches against visiting clubs(S&D {all}.S&DWBA, and Friendlies) plus visiting club players (county and district competitions) scoreboards would be available with team captain's being responsible for the sanitisation requirement before restowing in the equipment store.(Secretary to issue necessary instruction to team Captain's)

DECISTON Scoreboards to be available from 18 May 2021 only for matches against visiting clubs and players with strict sanitation requirement being in place before restowing in equipment store
